KAIVAC® AUTOVAC STRETCH™ CLEANING SYSTEM

CLEAN MORE WITH LESS

Don't let dirty hallways, cafeterias, warehouses or fitness areas drive customers and guests away. The **AutoVac Stretch System** is designed to clean wide-area hard surface floors with its extreme soil removal technology, sustainable green cleaning and autoscrubber performance at a fraction of the cost.

Just open the spigot to release the cleaning solution, turn the vacuum motor to "on" and start walking to evenly spread the solution across the floor while simultaneously vacuuming, and... DONE. It's truly that simple. When the vacuum tank becomes full, the operator has the option to empty the filtered contents back into the solutions tank to continue cleaning. The unique one-fill process and recycling option significantly saves on water and chemical usage while reducing cleaning time.

Kind of a no-brainer, right?
